No aircraft or flying was observed at the Stendal-borstel (4 53/Y 75) airfield. The hangars were closed. Soldiers and sentries wearing black-bordered, black epaulets were seen near the field kasernes.

25X1X

Comment:

No change as compared with observations of January 1950. It is assumed that an air unit is not stationed at the field. As motor vehicle numbers belonging to air force units have been continually reported from Jtendal, it is assumed that an air force ground unit is still stationed there. The field kasernes apparently are occupied by an army unit.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the Daned States.
